

Why Try the Vapour Warehouse E-cigarette?

- It's safer for you and those around you than traditional cigarettes.
- It's significantly less expensive than traditional cigarettes.
- It delivers all the sensations, taste and satisfaction of smoking but without any smoke, stink, ash or fire hazards of traditional cigarettes.
- It is completely tobacco free – eliminating the 4,000 known chemicals in tobacco leaf, including 19 toxins identified as carcinogens and 8 classified poisons.

So, even without reading any further, what are you waiting for?

Vapour Warehouse – a Colorado company offers the finest electronic cigarette, the only American produced nicotine juice and the best customer service available today!

Vapour Warehouse's Ultra Starter Kit is the perfect introduction to the world of electronic cigarettes!

Here's what you get:

- **A fully assembled e-cig**
- **10 charged cartridges**
- **Extra battery**
- **Extra atomizer**
- **A 15ml. bottle of "original flavor" nicotine juice**
- **Wall Charger AND a car charger for the batteries**
- **Instruction booklet**
- **Additional discount opportunities!**

All for only \$65.00!

Think about it – if you smoke a premium brand of cigarettes, you pay \$50 or more for 2 cartons of cigarettes. For 15 additional bucks, you're getting 2 cartons worth of tobacco free enjoyment!

But that's not all – with the Vapour Warehouse Ultra Starter kit, your future costs will be significantly less than what you're spending on cigarettes now – from 50% to 80% less!

Still need convincing? Well, consider this:

Many states have passed no-smoking legislation in public places. This includes offices, restaurants, sports and entertainment venues, bars and nightclubs, hotels and movie theaters. In large part, this is due to concerns about second hand smoke, aggravating bystander's respiratory problems and smoke allergies.

Since Vapour Warehouse's electronic cigarettes DO NOT burn anything, DO NOT emit smoke, they are not violating any anti-smoking ordinances when you inhale one. Even when you exhale, you are emitting nothing more than water vapor with a trace of propylene glycol – a natural oil used in many processed foods and medicines as a moisturizing agent.

Since electronic cigarettes are a relatively new invention, they have not been addressed by anti-smoking legislation and fall outside for the current regulations. While that might change in the future, right now, most restaurants, hotels, bars and nightclubs have no objections to 'vaping' – what's what experience e-cig users call inhaling.

Even if you don't smoke, you may know someone who does and wish they could kick the tobacco habit. Vapour Warehouse offers gift certificates for \$10, \$15, \$25 and \$50 you can give the smokers you care about to help them kick the tobacco habit forever!

Convinced? Time to kick the tobacco habit and get back to enjoying life!
